

# Succeed 2.0

# FindMyFlow

FindMyFlow ensures a student gets the most out of their DSA support.

## 1. FindMyFlow enhances 1-2-1 Training and Study Support.

FindMyFlow pulls the strands of the DSA together by combining Assistive Technology, study strategies and personal development. Designed to complement AT Training, Trainers can favourite particular strategies to create a personalised Flow, allowing students to practise and review strategies independently.

## 2. FindMyFlow provides On-Demand Support.

Only 33% of DSA students take up their face-to-face AT Training\* and FindMyFlow aims to connect and engage with the other 67%. With millions of people now seeking out new information and skills by watching content at a time that works for them, FindMyFlow helps to bring the DSA into the On-Demand video model of learning.

## 3. FindMyFlow understands the importance of Individualised Learning.

The DSA's greatest strength is how it adapts general education to the individual. FindMyFlow offers a tailored learning path based on an individual's DSA recommendations, putting bespoke learning at its core. We empower students to take control of their own learning by encouraging Reflective Practice. Reflections, actions, ideas can be added to the FindMyFlow Notebook and integrated into a Personal Action Plan.

Much more than just a 'how to' or a walkthrough of software features, recommending FindMyFlow helps students integrate their DSA Software into all aspects of their academic life.

To recommend Succeed 2.0 FindMyFlow on NARs,  
simply add one of the following justifications:

### **Permanent Reference Resource**

[Name] should also be provided with a subscription of Succeed 2.0 FindMyFlow, so that they have access to a permanent reference resource of videos, tools and strategies that will assist them in using the Assistive Software recommended below.

### **Reinforce AT Training**

Succeed 2.0 FindMyFlow has been recommended to support and reinforce AT training. This can be accessed continuously and on-demand by [Name], allowing them to practise or refresh techniques learnt during their AT training, as well as developing those skills with more advanced strategies.

### **Mental Health**

Succeed 2.0 FindMyFlow offers [Name] access to stress reduction strategies which utilise their recommended Assistive Technology. The strategies provide [Name] with techniques on how to make overwhelming study tasks feel more manageable.
